## Technical Bulletin: **Fixed Ring Chain**

### Description of chain:

Traditional Fixed Ring Skidder Chain for General logging conditions including hill climbing and slope traverse on any terrain including snow, ice and mud.

### Advantages:

- Main Fixed Center Ring with cleats provides increased traction in off-road terrain.
- The opening of the main rings assure excellent self cleaning.
- Boron Manganese Steel ensures quality and maximum performance of all components.
- Special heat treatment provides exceptional strength and wear properties.

### Material sizes:

Ring size:	Tag chain size:
1" (26 mm)	9/16" (14 mm)
	5/8" (16 mm)
1 1/4" (32 mm)	3/4" (20 mm)

### Material:

- High quality Boron Manganese Steel

### Hardness and Strength: (values refer to cross chain)

- Surface Hardness: 62.0 HRC
- Core Hardness: 40.0 HRC
- Case Hardening Depth: 0.70 - 0.90 mm
- Strength: 120 KN (9/16" welded ring)
