## Technical Bulletin: **Triple Diamond Net Chain**

### Description of chain:

Round Link Triple Diamond configuration with one welded stud per link. Our absolute BEST non-skid, net pattern chain.

### Advantages:

- Superior traction on all terrain.
- Dense chain net provides Excellent tread and side wall coverage of soft flotation tires.
- Smooth ride and less strain on drive trains.
- High quality Boron Manganese wear studs.
- Boron Manganese Steel ensures quality and maximum performance of all components.
- Special heat treatment provides exceptional strength and wear properties.

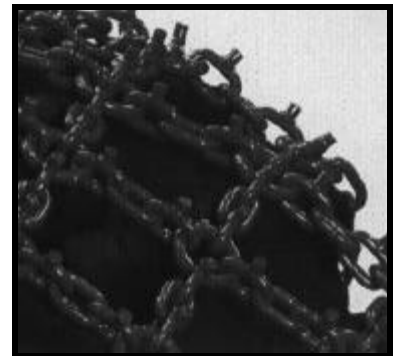

### Material sizes:

### Stud sizes:

- |                   | (D) | (H)        |
|-------------------|-----|------------|
| • Tag chain size: |     | Stud size: |
| 5/8" (16 mm)      |     | 18 x 26 mm |
| 3/4" (20 mm)      |     | 23 x 31 mm |

### Material:

- High quality Boron Manganese Steel

### Hardness and Strength: (values refer to cross chain)

- Surface Hardness: 62.0 HRC
- Core Hardness: 40.0 HRC
- Case Hardening Depth: 0.80 - 1.10 mm
- Strength: 160 KN (3/4" welded ring)
