## Technical Bulletin: **A 90/92 (single & dual triple version)** *Diamond Pattern Square Link Tire Chain*

### Description of chain:

Standard Diamond Pattern chain with 5.5 mm Alloy Square Links and Cams for easy tensioning.

### Advantages:

- Designed for fast and easy installation.
- Diamond Pattern provides smooth ride and improved lateral stability on wet and dry surfaces.
- Light weight high grade Boron Manganese Steel with special heat treatment process.
- Guaranteed long service life. Suitable for highway trucks covering long distances.
- Square link design provides excellent traction and high braking performance.
- Available in single or dual triple version.
- Reversible

### Link sizes:

- 5.5 mm square link, pitch 19.5 mm

### Material:

- High quality Boron Manganese Steel

### Hardness and Strength: (values refer to cross chain)

- Surface Hardness: 62.0 HRc
- Core Hardness: 38.0 HRc
- Case hardening Depth: 0.40 - 0.60 mm
- Strength: 20 KN (Ring)
