Technical Bulletin: **Double Floating Ring Chain**

Description of chain:

The Double Floating Ring Chain with more Rings and Cleats is designed to be used on wide flotation tires in all types of terrain.

Advantages:

- More Floating Rings and Cleats turn with machine providing less torque on all chain components.
- Special design reduces risk of chain breakage.
- Smother ride, because of dense chain net.
- Provides superior traction on any terrain.
- Excellent self cleaning.
- Boron Manganese Steel ensures quality and maximum performance of all components.
- Special heat treatment provides exceptional strength and wear properties.

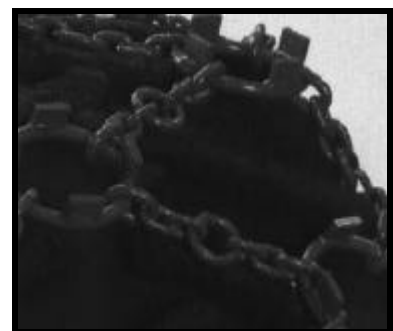

Material sizes:

Ring size:	Tag chain size:
1" (26 mm)	5/8" (16 mm)
1 1/4" (32 mm)	3/4" (20 mm)

Material:

- High quality Boron Manganese Steel

Hardness and Strength: (values refer to cross chain)

- Surface Hardness: 62.0 HRc
- Core Hardness: 40.0 HRc
- Case Hardening Depth: 0.80 - 1.10 mm
- Strength: 160 KN (3/4" welded ring)
