## Technical Bulletin: **Supergrip „SG“ Chain**

### Description of chain:

This dense, net type chain with additional hardened „wear rolls“ has been developed for heavy duty applications for big trucks and loader / graders for off-road usage.

### Advantages:

- Heavy dense net chain design provides aggressive traction and tire protection.
- Short pitched square link design allows more „leading edges“ to provide a better grip and high wearability.
- Special designed „wear rolls“ further guarantee wearability and long chain life.
- Build in tension chain guarantees excellent fit.
- 100% reversible for long chain life and increased value.
- Boron Manganese Steel ensures quality and maximum performance of all components.
- Special heat treatment provides exceptional Strength and wear properties.

### Material sizes:

- 7.0mm square link, pitch 24.5 mm
- 8.0mm square link, pitch 28.0 mm
- 9.0mm square link, pitch 31.5 mm, Wear rolls: N/A
- 10.0mm square link, pitch 35.0 mm, Wear rolls: N/A

### Material:

- High quality Boron Manganese Steel

### Hardness and Strength: (values refer to cross chain)

- Surface Hardness: 62.0 HRC
- Core Hardness: 45.0 HRC
- Case hardening Depth: 0.60 - 0.80 mm
- Strength: 35 KN (9 mm welded connection ring)
